Experienced IT professional currently studying to become a .NET Developer at YH Akademin. With a background as Application Specialist, Application Consultant and IT System Manager, I bring over a decade of experience working with business-critical systems, technical improvements and collaboration between business and IT. I am now looking for an LIA placement where I can grow as a C#/.NET developer while contributing with my previous professional experience.

Education

.NET Developer
Jan 2026 – Dec 2027
YH Akademin
.NET development, C#, web applications, databases and modern development practices.

Core Tech

- C#
- .NET

Summer break v. 22 - v. 34
Open to opportunities within backend, fullstack or system development.

Languages

Swedish Native
English Fluent

Selected Projects

View more at callenholm.dev →

- Fjärilarnas Värld**
 - HTML
 - CSS
 - JavaScript

A responsive school project focused on building a fictional zoo website with HTML and CSS. The page includes structured content sections, animal presentation, a newsletter form and a clean, user-friendly layout — something I really enjoy creating.
- Snake Game**
 - JavaScript
 - HTML
 - CSS

A JavaScript-focused school project where I worked with an existing Snake game codebase. The project focused on understanding, adapting and extending the game logic, while also improving the visual styling and user experience.
- Personal Portfolio**
 - HTML
 - CSS
 - JavaScript

Personal portfolio designed and developed from scratch with a custom interactive concept, responsive layout and dynamic JavaScript functionality. Built and published independently to showcase my projects, skills and experience.

Experience

- Application Specialist**2021 – 2025
Stadium AB*Solna*

As an Application Specialist at Stadium, I managed the development and operations of technical solutions for both Stadium and Stadium Outlet. My focus was on optimizing business applications and driving technology that maximized business opportunities and enhanced the customer experience.
- Application Consultant**2019 – 2021
FAST2*Stockholm*

Customized and configured systems through parameter settings to meet client needs. Participated in onboarding projects for new clients and delivered system maintenance training.
- IT System Manager**2014 – 2019
SATS*Stockholm*

Managed Exerp, the core Nordic membership system for SATS. Acted as primary liaison between business operations and the external vendor. Handled system configuration, maintenance, and release management. Collaborated daily with external partners on system development and optimizations.
